

MSE for PCR and PLS
Case I: 1 variable has strong connection with the response variable

(Change in % MSE b/n PCR and PLSR): 0 %

MSE for PCR and PLS
Case II: 1/3 of the dataset has high correlation

(Change in % MSE b/n PCR and PLSR): 0.6 %

MSE for PCR and PLS
Case III: 1/10 of the dataset has high correlation

(Change in % MSE b/n PCR and PLSR): -0.03 %

MSE for PCR and PLS
Case IV: all variables are correlated

(Change in % MSE b/n PCR and PLSR): 0.5 %

MSE for PCR and PLS
Case V: Data with no leading/strong factor

(Change in % MSE b/n PCR and PLSR): 0 %
