

### MSE for PCR and PLS

Case I: 1 variable has strong connection with the response variable

(Change in % MSE b/n PCR and PLSR): 81.51 %

### MSE for PCR and PLS

Case II: 1/3 of the dataset has high correlation

(Change in % MSE b/n PCR and PLSR): 90.15 %

### MSE for PCR and PLS

Case III: 1/10 of the dataset has high correlation

(Change in % MSE b/n PCR and PLSR): 82.08 %

### MSE for PCR and PLS

Case IV: all variables are correlated

(Change in % MSE b/n PCR and PLSR): -18.12 %

### MSE for PCR and PLS

Case V: Data with no leading/strong factor

(Change in % MSE b/n PCR and PLSR): 81.22 %
